Mr. Jim Voigt
Catoctin Mountain Park
USDI National Park Service
Thurmont, MD 21782

Dear Mr. Voigt:

Enclosed please find:
- 50 milk carton traps
- pheromone strips (little colored strips in a zip-lock bag)
- insecticide strips (in white foil packages)
- twist ties
- string
- directions for assembly of traps
- tally sheet(s) for recording moth catches
- a copy of the label for the insecticide strip

This should be all the material that is needed for the gypsy moth trapping program at Catoctin Mountain Park in 1995.

The pheromone and insecticide strips should be kept dry and cool until it is time to use them. Do not remove the insecticide strips from the foil package unless you are in a well-ventilated area. Be sure to read the enclosed insecticide label and avoid excessive handling of these strips. The traps should be deployed by **June 13** and checked at least once during the season. When checking the traps, empty all of the contents, count the number of gypsy moths, and record the date and number of gypsy moths caught on the enclosed tally sheet(s). Traps should be retrieved during the week of **August 31**, and a final count of gypsy moths can be recorded on the tally sheet(s).

By **September 15**, please return the completed tally sheet(s) with your total gypsy moth counts and a **map** depicting where the traps were deployed. If there is an error in the address and/or contact person, please notify us of this change. Please send all information to: Karen Felton, Forestry Technician, Forest Health Protection, USDA Forest Service, 180 Canfield Street, Morgantown, WV 26505.

We thank you for your continued participation in our gypsy moth monitoring program. If you have any questions, please contact me at 304-285-1556.

Sincerely,

KAREN D. FELTON
Forestry Technician
Forest Health Protection

By **September 15**, please return the completed tally sheet(s) with your total gypsy moth counts and a **map** depicting where the traps were deployed. If there is an error in the address and/or contact person, please notify us of this change. Please send all information to: Karen Felton, Forestry Technician, Forest Health Protection, USDA Forest Service, 180 Canfield Street, Morgantown, WV 26505.

We thank you for your continued participation in our gypsy moth monitoring program. If you have any questions, please contact me at 304-285-1556.

Sincerely,

KAREN D. FELTON

Mr. Dean Bonifacio
Bluestone Lake
U.S. Army Corps of Engineers
701 Miller Avenue
Hinton, WV 25951

Dear Mr. Bonifacio:

Enclosed please find:
- 30 milk carton traps
- pheromone strips (little colored strips in a zip-lock bag)
- insecticide strips (in white foil packages)
- twist ties
- string
- directions for assembly of traps
- tally sheet(s) for recording moth catches
- a copy of the label for the insecticide strip

This should be all the material that is needed for the gypsy moth trapping program at Bluestone Lake in 1995.

The pheromone and insecticide strips should be kept dry and cool until it is time to use them. Do not remove the insecticide strips from the foil package unless you are in a well-ventilated area. Be sure to read the enclosed insecticide label and avoid excessive handling of these strips. The traps should be deployed by **June 13** and checked at least once during the season. When checking the traps, empty all of the contents, count the number of gypsy moths, and record the date and number of gypsy moths caught on the enclosed tally sheet(s). Traps should be retrieved during the week of **August 31**, and a final count of gypsy moths can be recorded on the tally sheet(s).

By **September 15**, please return the completed tally sheet(s) with your total gypsy moth counts and a **map** depicting where the traps were deployed. If there is an error in the address and/or contact person, please notify us of this change. Please send all information to: Karen Felton, Forestry Technician, Forest Health Protection, USDA Forest Service, 180 Canfield Street, Morgantown, WV 26505.

We thank you for your continued participation in our gypsy moth monitoring program. If you have any questions, please contact me at 304-285-1556.

Sincerely,

KAREN D. FELTON

Mr. Jim Devore, Resource Manager
Stonewall Jackson Lake
Brownsville Road
Route 3, Box 370
Weston, WV 26452-9677

Dear Mr. Devore:

Enclosed please find:
- 30 milk carton traps
- pheromone strips (little colored strips in a zip-lock bag)
- insecticide strips (in white foil packages)
- twist ties
- string
- directions for assembly of traps
- tally sheet(s) for recording moth catches
- a copy of the label for the insecticide strip

This should be all the material that is needed for the gypsy moth trapping program at Stonewall Jackson Dam in 1995.

The pheromone and insecticide strips should be kept dry and cool until it is time to use them. Do not remove the insecticide strips from the foil package unless you are in a well-ventilated area. Be sure to read the enclosed insecticide label and avoid excessive handling of these strips. The traps should be deployed by **June 13** and checked at least once during the season. When checking the traps, empty all of the contents, count the number of gypsy moths, and record the date and number of gypsy moths caught on the enclosed tally sheet(s). Traps should be retrieved during the week of **August 31**, and a final count of gypsy moths can be recorded on the tally sheet(s).

By **September 15**, please return the completed tally sheet(s) with your total gypsy moth counts and a **map** depicting where the traps were deployed. If there is an error in the address and/or contact person, please notify us of this change. Please send all information to: Karen Felton, Forestry Technician, Forest Health Protection, USDA Forest Service, 180 Canfield Street, Morgantown, WV 26505.

We thank you for your continued participation in our gypsy moth monitoring program. If you have any questions, please contact me at 304-285-1556.
